

- Screw-in cartridge and in-line design
- Poppet valve - leak-free closing
- High switching reliability after long idling time
- Short switching times

Functional Description

The pilot operated 2/2 way solenoid actuated poppet valves control in the first line the start and stop function of the oil flow. The valve consists of the valve bushing (1), main control spool (2), return spring (3), cartridge with actuating system (4) and of the solenoid coil (5) that is mounted on the actuating system. The valve bushing is screwed into the cartridge part.

In the variant normally closed / normally open, the valve is securely held in the respective basic position by a spring. By energizing the solenoid coil the spring force is overcome and the pilot valve is pressed onto the seat or lifted. Opening and closing of the main control spool is hydraulically supported through the orifice boring created in the main control spool.

The DC solenoid coils can be delivered for 12 V and 24 V supply voltages. For AC applications 120 V/ 60 Hz or 230 V/ 50 Hz. With the AC high power solenoid coils, the rectifiers are integrated directly in the connector. By loosening the fixing nut (6), the solenoid coil can be replaced or turned in the range of 360°.

Notice.

The valves are supplied without solenoids coils. The solenoid coil, the terminal box and the body for line mounting have to be ordered separately.

Absence of current opened 2O2

Absence of current closed 2L2

Ordering Code

SD3E-A2 /

**2/2 Way Solenoid Operated
Directional Control Valve
Poppet Type 3/4-16UNF**

**No designation
V**

Seals
NBR
FPM (Viton)

High Performance **H**

No designation
M2 covered with rubber bootn only for 2O2
M5 socket head screw
M9 without manual override

Manual override
standard for 2O2
without manual override

Description
Refer to the table with functional symbols

Solenoid coil, terminal box and body for line mounting have to be ordered separately. For selection of solenoid coil and terminal box type use catalogue HA 8007. For selection of valve body for in-line mounting use catalogue HA0018.

Functional Symbols

Designation	Symbol	Designation	Symbol
202		2L2	

Manual Override

Dimensions in millimeters (inches)

No designation - Standard for 202

Designation **M9** - for 2L2
without manual override

Designation **M9** - for 202
without manual override

Designation **M2** - for 202
covered with rubber bootn

Designation **M5** - for 202
by screwing in of the socket head
screw 2,5(0.098)

Designation **M5** - for 2L2
by screwing in of the socket
head screw 2,5(0.098)

Technical Data

Valve size	A2	
Cartridge cavity	3/4-16 UNF -2A (according to ISO 17209)	
Maximum flow	L/min (GPM)	30 (7.9)
Max. operating pressure	bar (PSI)	420 (6091)
Pressure drop	bar (PSI)	see Δp -Q characteristics
Hydraulic fluid	Hydraulic oils of power classes (HL, HLP) to DIN 51524	
Coil groups ¹⁾	C19B	
Fluid temperature range	°C (°F)	-20 ... 80 (-4 ...176)
Ambient temperature, max.	°C (°F)	-20 ... 80 (-4 ...176)
Viscosity range	mm ² /s (SUS)	10 ... 500 (49 ... 2450)
Maximum degree of fluid contamination	Class 21/18/15 according to ISO 4406.	
Permissible rated voltage variation	%	AC, DC ± 15
Max. switching frequency	1/h	15 000
Duty cycle	%	100
Service life	cycles	10 ⁷
Enclosure type to EN 60529 ¹⁾	IP 67 (IP 65)
